Fairlington Glen Homeowners Association
Fairlington Meadows Homeowners Association
Arlington, Virginia

Reference: Notification of Site Work (ECS project no. 1507-D)

Dear Resident:

ECS Mid-Atlantic, LLC (ECS) will be collecting groundwater samples in the neighborhoods as required by the schedule within the established agreement with the homeowners associations for the residents of the Glen and Meadows. ECS will be collecting groundwater samples from the existing monitoring wells located around several homes and in the green space located around courts 1, 2, 7, and 14 around the intersection of 34th Street S. and S. Stafford S.

No heavy equipment (e.g., drilling rigs) will be required. The work will be performed by one or two man teams that will likely be at any given well only briefly (about an hour per location). Additionally, ECS will be checking on the operation of sub-slab depressurization systems (SSDSs) installed at several homes. The SSDS inspections are performed from the exterior of these homes and do not require entry to the residences; these inspections involve verifying that the fans are running and the piping is intact.

All care will be taken to cause minimal disturbance to any regular activities. We plan on starting the work June 28th and it should take 3-4 days to complete. If you should have any questions, please contact your homeowners association representative, or call us at the number provided below.

We appreciate your understanding and cooperation,

ECS MID-ATLANTIC, LLC
